Bachelor of Science in Mathematics

Note: All bachelor’s degree students are required to complete the general education requirements, at least one major course of study, and enough electives to total a minimum of 120 semester hours of credit.

General Education Courses (33-34 Credit Hours)

General education is composed of a Christian liberal arts core curriculum that seeks to transform students to think, live and serve as Christian leaders in the 21st century. General education courses are carefully designed with job preparation in mind, aiming at helping students develop the important career skills that employers are looking for.

All students (online and campus) are educated to be competent in the following areas:

Computer Programming and Information Systems Skills

Students majoring in mathematics are well advised to acquire skills in computer programming and information systems. Academic advisors can guide students to the appropriate courses in the information systems technology program.

Notes:

- A minimum cumulative GPA of 2.0 is required to graduate and maintain good academic standing. Some majors also require a minimum grade in all major courses. Please see Degree Works or the Undergraduate Catalog for these specifics.
- 50% of all major requirements must be taken at Regent University.
- Please reference Degree Works for course pre-requisite information.
- As a general rule of thumb, 100 and 200 level courses should be taken prior to upper level (300 and 400) level courses.
