

## ETS® Proficiency Profile

### Summary of Scaled Scores

To show the ability of the group taking the test

**Regent University**

**Abbreviated**

**Test Description:** ETS Proficiency Profile

**Number of students tested:** 121

**Number of students included in these statistics:** 104

**Number of students excluded (see roster):** 17

**Cohort Name:** Summer 2022

**Close Date:** Combined

**Student Level:** GENE 402

	Possible Range	Mean Score	95% Confidence Limits* for Mean	Standard Deviation	25th Percentile	50th Percentile	75th Percentile
<b>Total Score</b>	400 to 500	439.27	437 to 442	19.37	425	436	451
<b>Skills Subscores:</b>							
<b>Critical Thinking</b>	100 to 130	110.41	109 to 112	6.07	107	109	115
<b>Reading</b>	100 to 130	117.06	116 to 118	7.54	111	118	124
<b>Writing</b>	100 to 130	113.23	112 to 114	5.63	108	114	117
<b>Mathematics</b>	100 to 130	111.55	110 to 113	4.85	108	112	115
<b>Context-Based Subscores:</b>							
<b>Humanities</b>	100 to 130	115.43	114 to 117	6.52	109	116	121
<b>Social Sciences</b>	100 to 130	112.91	111 to 114	6.55	107	112	117
<b>Natural Sciences</b>	100 to 130	114.28	113 to 116	6.44	110	115	119

\*The confidence limits are based on the assumption that the questions contributing to each scaled score are a sample from a much larger set of possible questions that could have been used to measure those same skills. If the group of students taking the test is a sample from some larger population of students eligible to be tested, the confidence limits include both sampling of students and sampling of questions as factors that could cause the mean score to vary. The

confidence limits indicate the precision of the mean score of the students actually tested, as an estimate of the "true population mean" - the mean score that would result if all the students in the population could somehow be tested with all possible questions. These confidence limits were computed by a procedure that has a 95 percent probability of producing upper and lower limits that will surround the true population mean. The population size used in the calculation of the confidence limits for the mean scores in this report is 104.
