

Math Specialist: M.Ed. & Ed.S.

2024-2025

Candidates in the Mathematics Specialist program complete a culminating action research project requiring them to design, implement, and evaluate an instructional intervention in a real-world educational setting. The project includes problem identification, literature review, data collection and analysis, and evaluation of student learning outcomes. Results from the first cohort (2024-2025) indicate that **100% of candidates met or exceeded proficiency expectations**, demonstrating their ability to apply content knowledge, use assessment data to inform instruction, and positively impact student learning.
